### Channel/WAN Protocol Analyser

*Finally, a mid-range portable WAN analyser that operates under Microsoft Windows<sup>™</sup>—at up to 256 Kbps!*

#### Key Features

*Windows based graphical user interface.*

*Handles up to five tasks simultaneously.*

*Includes its own Y cable.*

*Easy to upgrade.*

#### Overview

The Channel/WAN Protocol Analyser features a Windows based interface that makes the software easy to use, so you can get right to work.

A real time saver, the Analyser handles five tasks at the same time. Each task can operate under a separate window on the screen — or as an icon in the background.

The Analyser performs a variety of tasks, including

data capture, on-line statistical displays in various graphic forms, real-time display and recording, analysis procedures, and station monitoring.

The unit can include two full-duplex channels (optional) — and can tap into any physical interface on the link, including T1, FT1, E1,

FE1, V.35, X.21, and RS-530/449/232.

A special Y cable with built-in electronics (included) eliminates interruptions to the line when tapping-in or disconnecting from a network.

A unique upgrade package is also available.
