### Video to VGA Converter

*Watch TV on your  
VGA monitor—no  
software needed!*

#### Key Features

- ▶ *Converts PAL, SECAM, and NTSC standards to VGA.*
- ▶ *Enables video time-base correction and freeze-frame.*
- ▶ *Supports stereo sound.*

#### Technically Speaking

Now you can watch television on your VGA monitor without any additional software. The Video to VGA Converter converts without any software all video composite signal PAL, SECAM, NTSC, and Y/C or RGBS in VGA standard.

Automatic detection of Composite Video standards,

high resolution, integrated Time Base Corrector function, line doubling, provide you a very good picture resolution and the best visual comfort.

Automatic or manual priority detection, audio stereo connection, and user controls make the Video to VGA Converter very friendly to use in all configurations.

The Video to VGA Converter is particularly suited for LCD projector,

video display on computer's VGA monitor, multisync monitor, LCD panel, video-projector data, and many other applications. The boosted outputs allow a long VGA distance of up to 500 feet (150 meters).

This universal Video to VGA Converter, without software, brings a new dimension to your VGA equipment.
