Ethernet ISA 10BT and Combo Adapters

Combine NE2000 industry standard functionality with Windows 95 plug-and-play support.

Key Features

▶ *Full-duplex operation with UTP cable.*

▶ *Two LEDs for troubleshooting.*

▶ *Includes 16K buffer RAM for faster network transmission.*

Technically Speaking

With the Ethernet ISA and Combo Adapters you get Windows® 95 plug-and-play support with NE2000™ industry standard functionality.

The Ethernet ISA 10BT Adapter is a 10 bit Ethernet card that uses 10BASE-T only. The Combo Adapter has connectors for 10BASE-T, 10BASE-5, and 10BASE-2 already on it.

Both have full NE2000 compatibility that makes them easy to install on DOS, Windows 95, Windows NT™, OS/2®, and UNIX® operating systems. The Adapters also feature trouble-free hot-swap insertion and removal, and no proprietary drivers are required.

For these and other components...
