Apple® Cabling

No matter what type of Apple connection you need to make, we've got the cables to get the job done.

Technically Speaking

Whether you're looking for a common Apple® cable, a hard-to-find item, or the latest addition, we have everything you need to get your Apple equipment up and running.

Modem Cables
With an Apple AT Command Set Modem Cable you don't have to buy a new modem — you can connect a modem you already own. Choose from 1.8-m (6-ft.) or 3.0-m (10-ft.) lengths.

PowerBook Cables
Whether you need to download information from a PowerBook™ to your desktop or dock your PowerBook at a temporary location, these are the cables for you. Three connector types are available.

Monitor Cables
These heavy-duty cables come in 1.8-m (6-ft.) lengths with male-to-male or male-to-female DB15 connectors.

Extension Cables
These cables give you more distance from your peripherals—up to 39 m (128 ft). Choose from 1.8-m (6-ft.) or 3.7-m (12-ft.) lengths.

Mac DB15 to 4 BNC Coax Connectors
When you need to connect a high-definition monitor to your Macintosh computer, look no further. This Cable uses a simple color-coded system for trouble-free installation. It also features molded BNC leads for strain relief. Woven shielding guards against EMI/RFI interference.

No matter which cable or connector you choose, you can be sure it's built to last— it's guaranteed for life!

Ordering Information

This information will help you place your order quickly.
