iMac USB CABLE A—B PLUG

*These USB cables for Mac[®]
come in a rainbow of colours.*

Key Features

- ▶ **Complies with USB Specification Revision 1.1.**
- ▶ **Fully compatible with the PC.**
- ▶ **Molded strain relief and PVC overmolding to ensure a lifetime of error-free data transmissions.**
- ▶ **Supports up to 127 devices on a daisychain configuration.**

The iMac[®] USB Cable A—B Plug offers several benefits:

- It complies with USB Specification Revision 1.1, and has a fully rated USB 12-Mbps transmission speed.
- High performance from one 28 and 24 AWG stranded twisted pair with 28 AWG drain wire or non-shield power wires.
- Support asynchronous and isochronous data transfer.
- Available in 3-, 6-, 10-, or 15-ft. lengths.
- Provide type A and B connections.
- These cables are 100% compliant with current USB specifications.
