### LBS224C-xx manual

#### **Fiber Module**

**Notice: Please refer to the 24 port console port user's manual.**

When fiber module is plugged in Switch Hub.

You will see

```
      24 Ports Smart Switch Hub v1.1
***** Setup Menu *****
1. Port setup
2. VLAN setup
3. Trunk setup
4. Restore default setup
5. View status
6. Fiber module setup (Port 24)
Select?
```

The configuration on PC is successful.

#### **Fiber Module Setup (Port 24)**

When FX module is plugged in a Switch, the original RJ-45 of port 24 will disable. Fiber module will be setup to 100Mbps full duplex at the same time. If you want to change the default value, please execute the command to change duplex mode to half duplex mode. Even you could make the fiber module disable.

```
6. Fiber module setup (Port 24)
Select?6
Port 24 Fiber enable or disable (E/D)?E
Port 24 Fiber enable & RJ-45 disable
Choose Fiber at Full or Half duplex mode (F/H)?
```
