Power Supply Module for the Pro Switching System

Use this power supply with the Pro Switching System's rack chassis. It's a 115/230-VAC, 50- to 60-Hz auto-selectable power supply. You can have one or two (for redundant power) power supplies in a rack.

To install the power supplies, insert them into the power supply slots located on the front right side of the rack. If you are only installing one power supply, you can insert it into either slot.

The power supply weighs 4 pounds (1.8 kg) and has an IEC 320 male input connector.
